Testing as a Service

Improve Efficiency
We help our clients improve processes efficiency and enhance customer experience using Digital Process Automation technologies such as BPM, RPA, Mobility, AI/ML, Blockchain deployed in Cloud.

What We DoServices we offer to support growth

Digital Innovation

Our Digital Strategy focuses on simplicity, usability, and customer experience.

Process Automation

Get ahead of the competition by dramatically improving process efficiency using Robotic Process Automation (RPA).

Application Development

Our Application Development as a Service (ADaaS) helps you get to market faster.

CIO Review Program

Not getting the desired ROI from IT projects?

Contact us to setup a technology review and digital strategy consultation with our Tech Expert. Tell us about the challenges your business is facing in your technology transformation journey and we will propose a solution.

Our ApproachMethodology we follow for successful delivery

We follow a methodology that is a combination of Iterative Model (Agile) and Lean Development which provide a robust and reliable framework for our projects.

Requirements evolve during project lifecycle
We understand that requirements can't be set in stone; so, instead, we set the scope based on business goals and objectives.

Small teams in Continuous Delivery(CD) Pipeline
We use small, self-sufficient teams we call PODs which work in a Continuous Delivery (CD) pipeline for rapid delivery.

Playbacks for timely user feedback
We do user playbacks after each dev iteration so users get to see the project progress and can provide early feedback.

Requirements evolve during project lifecycle

Our services

From Digital Transformation to Blockchain, we are the partner you can rely on for all your technology needs.

Home

Our Services

What We DoServices we offer to cater to your tech needs

Digital Innovation

Our Digital Strategy focuses on simplicity, usability, and customer experience.

Process Improvement

We help you envision smarter processes using the best of BPM, ODM, AI, and Blockchain.

Process Automation (RPA)

Get ahead of the competition by dramatically improving process efficiency using RPA.

Application Development

Our Application Development as a Service (ADaaS) increases your speed to market.

Cloud Services

Our cloud-first strategy helps orgaizations to become agile and reduce capital spend.

Testing as a Service

We provide independent software QA and testing services to ensure client satsifaction.

Why Choose UsThe advantage we offer over our competition

Innovative Thinking
At CGS Labs, we are developing solutions for everyday challenges using innovative new technologies. We work like a startup and deliver like a pro.

Rapid Development
Why reinvent the wheel? Our projects effectively reuse code, components and templates which helps us deliver faster and focus on business goals.

Continuous Deliver (CD)
We have perfected Continuous Delivery using small, self-sufficient teams working on micro projects, delivering fast and being truely agile.

Local US Delivery
We understand the need to work in closely with business. Our team splits the time between our dev center in Houston and the clients office.

Digital Experience

Modernizing, Disrupting, or Innovating for new Revenue Channels?
   We can Help!

Overview

Today's CIO is tasked with effectively utilizing Digital Experience to gain competitive edge and become a market leader. Digital Marketing, Social Media and Mobility provides a unqiue opportunity for building customer loayaltiy and growing business. Our Digital Stratgey focus on simplicity, usability, and enhanced customer experience.

How We Help

Digital Strategy

Technology platforms like Netflix, Uber, or Paypal have show how well estabished industry leaders can be disrupted by small companies with the help of a strong Digital Strategy. Work with our experts to develop a sound digital strategy that is tailored as per your business goals.

UI/UX Design

As the consumer gets digital savy, creative thinking is esential to correctly apprehend user expectations, goals and behaviour patterns while designing user interfaces in order to provide a meaningful experience that will define the brand.

Mobile & Future Tech

Advancement in Mobilie devices, future techs such as Smart Watches, Google Glass, Smart Home techs such as Amazon Alexa and Google Home are helping businesses find new ways to connect with the customer. Talk to us about how these techs can help you reinvent your business.

Digital Marketing

The average person will spend more than five years of their lives on social media, according to a recent study. This is the reason why Social Media Marketing is becoming the most effective channel to reach the consumers and also get a quick feedback.

Process Improvement (BPM)

Do you think your team is not performing at it full potential?
    We can show how BPM can help improve operation efficiency.

Overview

Recent technology advancements are enabling business envison smarter processes that improve efficiency and reduce cost of opetaions by combining Business Process Management (BPM), Operational Decision Management (ODM) and Blockchain technologies. Our six-sigma certified process experts will review your current as-is process and recommend solutions.

How We Help

Process Discovery

Documenting every process is vital for smooth operation of a business. Our Process Analysts work with the process owners and knowledge workers to understand current as-is processes and document them using process modelling tools.

Process Improvement/BPM

Leveraging our years of experience in BPM, our solution SimplyBPM provides an Open Standards based solution for Process Improvement with all the benefits of BPM, but without the traditional licensing costs or mainetanance overheads.

Operational Decision Manager (ODM)

Embedding Business Rules in Applications results in rigid processes that are hard to change. ODM puts the power of changing the rules into your business users hands, helping them to collaborate with IT and bypass cumbersome application development queues.

Blockchain

Blockchain is allowing companies to reimagine business processes that can now span across the enterprise boundaries to include vendors, partners and clients participating in a live business process which is decentralized, transparent and secure.

Robotic Process Automation (RPA)

How would you like to improve your team's performance by automating manual tasks, reducing human errors, improving efficiency, and lowering overhead costs?

Home
Services
RPA

Overview

RPA is the equivalent of employing Superman in your workforce. Software bots are developed to automate manual and repetitive tasks, completing the tasks in a fraction of the normal time. The result: reduced cost of operations, elimination of human errors and greatly improved quality. The end goal is to streamline your business and provide the highest quality customer experience. Imagine Clark Kent zipping from PC to PC completing all tasks faster than a speeding bullet. That is RPA in a nutshell!

Why Choose RPA?

Forrester estimates that, by 2021, there will be over 4 million robots doing office and administrative and sales and related tasks.

The reason for the rapidly growing popularity of RPA is because of the ability to automate business processes without building new IT systems or re-engineering the entire processes.

RPA is not just a new flavor of technology but a new approach to addressing office-centric data, handling and processing tasks that previously required manual re-keying, spreadsheets and hardcopy documents.

Improved Data Quality
RPA automates processes that have a higher probability of human error, which results in higher quality of data captured.

Faster Operations
Employees manually entering data into typically slows down processes. Bots work tiredlessly helping improve speed of operations.

Increased Employee Productivity
Employees are happier that they don't have to spend time on repetitive data entry tasks and can focus on more productive things.

About Us

Who we are

Cypress Global Services is team of talented technology enthusiasts and we love finding solutions. We think like a Startup and work like a pro.

We deliver innovative technology solutions that improve operational efficiency and enhance customer experience. We help our clients in their Digital Transformation journey by building Applications that outperform their competition. We are challenging the norms of IT outsourcing by developing secure, reliable, and economical solutions, right here in the United States.

Cypress Global Services has strategic partnerships with leading teachnology providers including IBM, Microsoft, Amazon, Appian, RedHat, UiPath, and Mulesoft. In 2015, we were ranked in top 500 on the Inc 5000 list of fastest growing private companies in the United States.

Mission

Cypress Global Services was founded on the principle of providing smart solutions for solving complex business problems. Our mission is to help our clients realize business benefits through effective use of technology.

What Clients say

Engineering ManagerLeading Oil & Gas firm

Director of OpsLeadinf Financial Co.

Why Us

Proven Team

We have a strong team of Certified IT experts that have successfully implemented several projects.

Quality Focus

We follow industry best practices without compromising project timelines. Our in-house QA team reviews all deliverables.

Lean Methodology

Our implementations are based on principles of LEAN which focuses on steps that add value to the client.

Honest Pricing

Our teams are lean and we do not hire sub-contractors which keeps our pricing very competitive.

Our Framework

SimplyBPM provides our team a strong foundation to develop the apps on.

Mentoring/Training

We have an internal Training program for employees. We mentor client employees so they can support the application.

100% US Delivery

Our offsite team work from Houston ODC and follows the clients timezone, just like an extended team.

Employee Satisfaction

Offsite delivery helps avoid unnecessay travel and employees get more family time.

Subscribe to our Newsletter for latest on emerging tech.

We deliver Transformative Technology Solutions for Digital Innovation, Process Improvement and enhanced Customer Experience using BPM, RPA, Mobility, AI and Blockchain. We have the team you need so you can innovate like a startup.
